

Errata

I noted few mistakes after printing -regrettably!- that I correct here:

◀ p.5: the photo of Haghiers Mts inconveniently “slided” and showed more sky than needed.

p.44: the photo of *Halocnemum* at the top right was amplified by mistake ▶

p. 27: ~~*Corallocarpus boehmii*~~ is probably *Eureiandra balfourii*.

p.47: the picture below, left is probably *Ledebouria revoluta*.

p. 48, 56 & 57: You must read read *Lycium socotranum* and not ~~*Lycium sokotranum*~~

Between the page 58 and 59, the blank page is a technical error: however it can be used to write notes.

Finally, the legend of each photo on the right indicates the name of the plant in socotri. Joël Lodé
